The microscope reveals the hidden, dangerous germ. But the eye of Science sees deeper sees further than the microscope. Looking behind the five colors - violet, blue, green, yellow and red that compose white light-Science saw ultraviolet and infra-red rays that are harmful to human eyes and sight. These rays slowly yet surely weaken vision. But now after years of research Sir William Crookes, the eminent scientist, has given the world Sir William Crookes Glass which shuts out—filters—and absorbs these dangerous rays. Consult your own Oculist Optometrist or Optician Every eyeglass and spectacle prescription can mow be filled and your lenses ground from this wonderful new glass. Every eyeglass or spectacle wearer - in the Interests of greater eye-efficiency-should visit at once his oculist, optometrist or optician. Begin at once to benefit by the precious gift Science has given you. Sir William Crookes Glass is ground and guaranteed by the sucrio's greatest optical laboratories American Optical Company Southbridge, Mass. Dr. de la Piaza, the venerable retiring president of the Republic, whose term of affice expires in October when the Endical, Dr. Irigoyen, assumes the presidency, delivered his valedictory to Congress on May 30. He is given credit for having had a safe if not brillant administration.

Antonia. - After enjoying the shelter of its big cancas tent for more than a prison walls. The prison was surrounded by a detachment of federal infantry and the state of seige is still maintained. Similar, though less serious, trouble has occured at the prisons in Santa. Te province.

Lebor troubles constitute another disturbing factor. The municipal scavengers in the capital have been on

WESTERLY FIREMEN IN N. E. LEAGUE

Veteran Association to Participate in Tournaments-Widow of William Hoxsey Dies in New York-Band Concert-Pleasant View Improvement Association Holds Annual

The Westerly Veteran Firemen's association, which includes the seasoned fire lighters of Pawcatuck, is going beyond the realms of a purely social organization, and is to become active to a degree that will recall the days when as how "they ran wid der morbeyond the realms of a purely social organization, and is to become active to a degree that will recall the days when as boys "they ran wid der merchine and manned the brakes." The association recently became affiliated with the New England Firemen's league and now proposes to participate in the parades and tournaments, and expects to have a hand fire engine, well manned, to compete in prize squirting contests. The local association is comparatively young and the members are fully uniformed and propose to be well equipped in all that pertains to veteran firemanship. The association has option on two engines that have excellent mustor records, the Defiance of Fall River and the Star of Cranston of Cranston The former is a twelve and one-half inch stroke machine, and to work the brakes to full capacity would require a crew of sixty men. The Cranston machine has a nine-inch stroke machine, and to work the brakes to full capacity would require a crew of forty men. While the whole matter was left with the special committee of which David Robinson is chalirmen, the sentiment of the meeting, which was held Wednesday evening, which was held Wednesday evening, which was held Wednesday evening, favored the Cranston machine. Officer for the ensuing year were elected as follows: William R. Wilsox, president; Edgar J. Sloom, first vice president; Pavid W. Robinson, Nelson W. Hines, received the Cranston machine screening, which was held Wednesday evening special president; Pavid W. Robinson, Nelson W. Hines, received the Cranston machine president; Pavid W. Robinson, Nelson W. Hines, received the Robinson, Nelson W. Hines, delegates to New England Piremen's convention, John Hines, divergence of public roads.
